

euNetworks' Ethernet Services

euNetworks Ethernet services, providing freedom of choice for your business

Today's business environment requires your network to be available, resilient, and flexible with your changing business needs, whether you want to connect two important sites together, connect office to data centre or data centre to data centre.

euNetworks Ethernet services offer flexible topologies including: point-to-point, point-to-multipoint or any-to-any, each in scalable speeds from 100Mbps up to 10Gbps, within a city or internationally.

We understand that your network is vital to your business. We offer a variety of protection mechanisms which reroute traffic to an alternative path within milliseconds in the event of a network failure. This ensures the best possible network availability.

Backed up by an industry-leading SLA with availability commitments from 99.5% to 99.95% and latency commitments, our network is monitored 24 hours a day, 365 days per year.

euNetworks' Ethernet services are available in all major data centres and over 180 other buildings across Europe.

Key Features

- Freedom of choice, available as point-to-point, point-to-multipoint or any-to-any
- Secure, dedicated connectivity for each customer requirement
- Scales from 100 Mbps up to 10 Gbps
- Near-unlimited capacity allows the customer to upgrade at low incremental cost
- Enables data centre and customer site consolidation
- Supported by industry leading SLA
- Supporting all the latest technologies including to ensure lowest possible latency
- Integrated IP and metro Ethernet solution – one handoff combining all your services
- Available from over 100 data centres across Europe and over 180 other direct premises

Point to Point
(P2P)

Point to Multipoint
(P2MP)

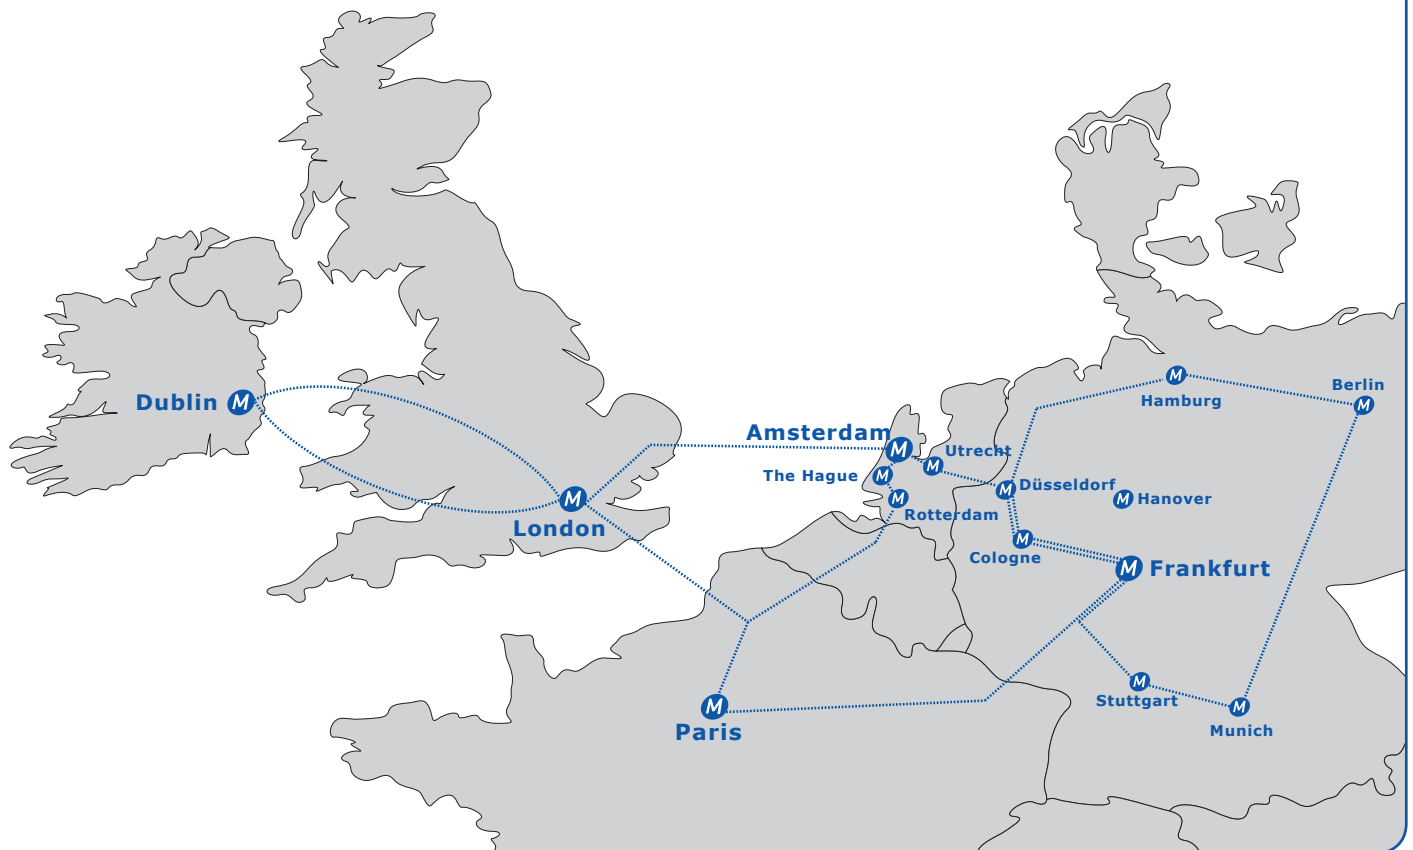

Any to Any
(A2A)

About euNetworks

euNetworks Group Limited (SGX: H23:SI) is a bandwidth infrastructure provider and owns 15 fibre based metropolitan networks across Europe connected with a high capacity intercity backbone. The company offers a portfolio of metro and longhaul Ethernet and Internet Protocol services including dark fibre, dedicated fibre, wavelength, Ethernet, and Internet. Enterprise and carrier customers benefit from euNetworks' unique inventory of fibre and duct based assets that are tailored to fulfil their high bandwidth needs.

euNetworks Group Limited is headquartered in London and publicly listed on the Singapore Stock Exchange. For further information visit www.eunetworks.com.
