

about us

bandwidth changes everything

bandwidth changes everything

We are a facilities based bandwidth infrastructure provider, delivering scalable, fibre based network solutions to our customers across Europe.

14

metro cities with unique duct and fibre ownership

49

connected cities across 14 countries

300+

connected data centres, means we are Europe's leading data centre connectivity provider

13

directly connected cloud platforms and access to a further 7 means we are Europe's leading cloud connectivity provider

our service

Our cloud enabled processes allow us to offer fast and flexible service delivery and provisioning - making us easy to do business with.

We control our service delivery performance and offer full operational transparency through our own customer portal.

our support

We offer local on the ground support in each of our operating markets. This means a consistent end-to-end experience for all of our customers, from design to deployment and beyond.

our products

Using our focused products, we deliver targeted bandwidth solutions for our customers.

	description	detail	speeds and topologies
 Dark Fibre	A secure foundation on which to base your infrastructure. Scalable, offering the ability to add capacity and applications when needed at low incremental cost	Leased fibre by the strand in the metro or long haul. Covering 14 cities of Dublin, Manchester, London, Amsterdam, Rotterdam, Utrecht, Paris, Dusseldorf, Cologne, Frankfurt, Stuttgart, Munich, Berlin and Hamburg	<ul style="list-style-type: none">• G.655 and G.652 fibre in euNetworks owned and operated trenches and ducts• Point to point• Diverse point to point• Rings
 Metro Wavelength	Supporting the need for high bandwidth connectivity in the metro, DC-DC and DC to enterprise buildings	Layer 1 WDM transmission service, available as shared or customer dedicated infrastructure across 14 metro cities with diverse route options	<ul style="list-style-type: none">• Point to point and diverse point to point• 10Gbps and 100Gbps Ethernet• 1Gbps, 2Gbps, 4Gbps, 8Gbps and 16Gbps fibre channel• Additional interfaces and data formats – Infiniband, 1G or 40G, on request
 Long Haul Wavelengths	Transmission product combining an advanced DWDM platform spanning Europe, with unparalleled metropolitan area reach & delivering DC-DC connectivity between cities	Connecting euNetworks' metro cities with diverse and triverse solution options, rapid turn up times and competitive pricing	<ul style="list-style-type: none">• Point to point and diverse point to point• 10Gbps and 100Gbps Wavelengths• Additional interfaces and data formats – 40G/OTU3, 100G/OTU4, on special request
 Ethernet	Carrier grade Ethernet using MPLS/VPLS technology. Offering private connections between locations, bringing the advantages of the LAN into the WAN	Available within & between metro cities, offering plug & play and a highly scalable networking solution on Layer 2 architecture. Fully managed or customer managed options available	<ul style="list-style-type: none">• 10Mbps to 10Gbps• Protected path• Suitable for any to any networks• Upgrade of our carrier Ethernet core network to 100Gbps, enabling further options between cities and to Cloud Service Providers
 Internet	Tier 2 ISP (AS13237) leveraging the combination of direct peering relationships and upstream transit from Tier 1 ISPs	Supporting the provision of access to the Internet & offered either with basic or managed connection	<ul style="list-style-type: none">• 10Mbps to 10Gbps• Volume, flat or 95th percentile tariff• Managed firewall• Over 300 peers

our solutions

euTrade

Our ultra low latency, market leading optical transmission service, run over a dedicated network platform.

euSpectrum

A cost effective alternative to procuring long haul dark fibre while building a managed multi terabit backbone.

Private Connect

Dedicated private network offering fibre and equipment to a single customer.

DC Connect

Pre-deployed connectivity between key data centres in cities, with rapid service delivery.

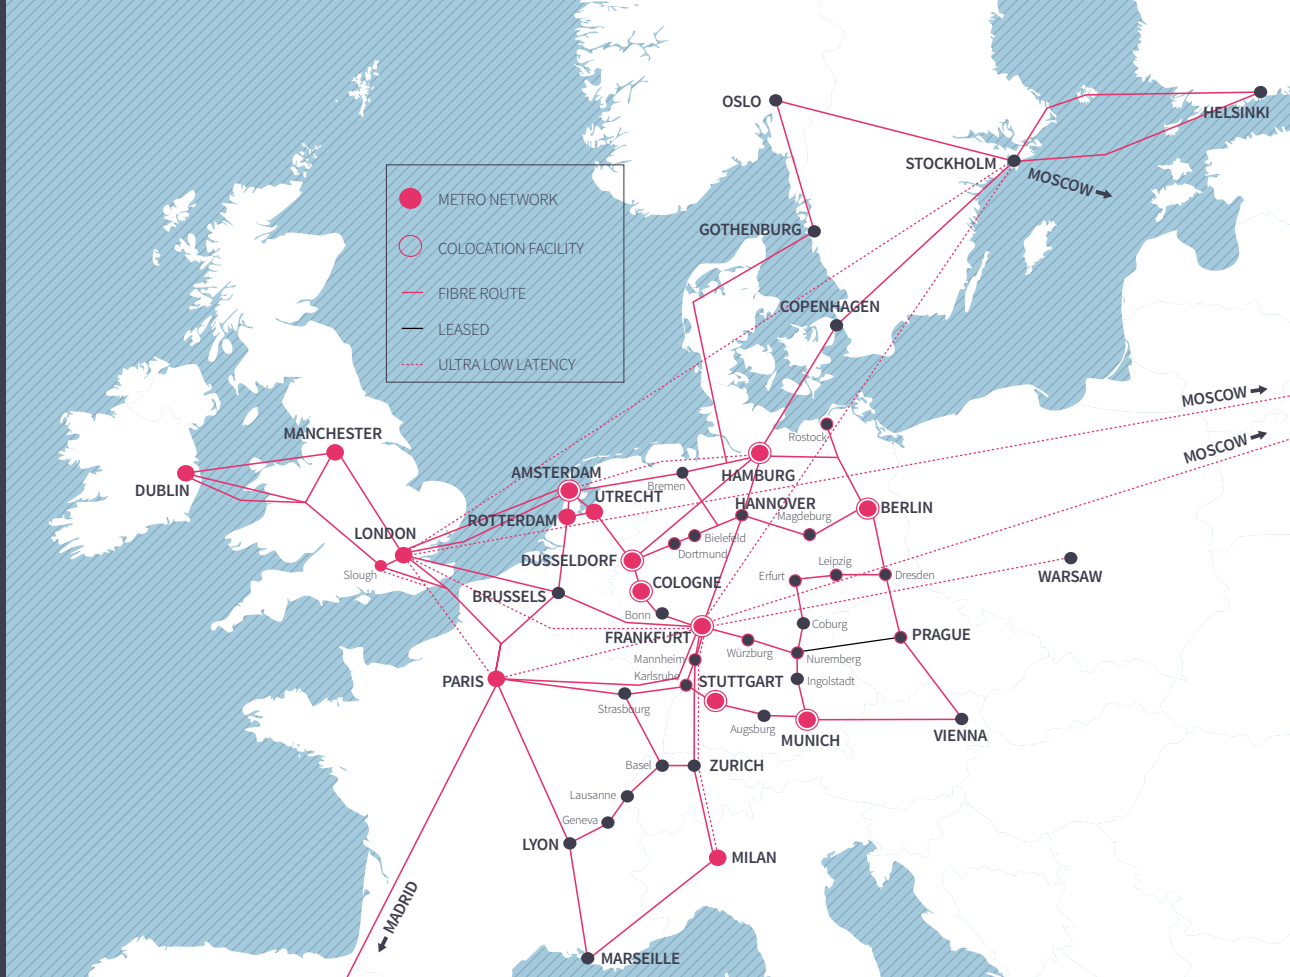

Cloud Connect

Private and secure access to all major cloud providers with fixed, burstable and usage based billing available.

Remote Peering

Peer at Internet Exchanges across Europe without the need to have a physical presence, substantially reducing your costs to access 'eyeballs' in major markets.

our network

At the core of our service is our network. We own and operate high capacity fibre networks in many of Europe's key business centres as well as a truly diverse and triverse backbone network.

We continue to invest in our footprint, adding new capabilities to sites in cities as well as new routes between cities and expanding our fibre reach.
